

# KeePass Emergency Sheet

24/5/2023

## Database file:

D:\ELGC.kdbx

You should regularly create a backup of the database file (onto an independent data storage device). Backups are stored here:

## Master Key

The master key for this database file consists of the following components:

- **Master password:**

## Instructions and General Information

- A KeePass emergency sheet contains all important information that is required to open your database. It should be printed, filled out and stored in a secure location, where only you and possibly a few other people that you trust have access to.
- If you lose the database file or any of the master key components (or forget the composition), all data stored in the database is lost. KeePass does not have any built-in file backup functionality. There is no backdoor and no universal key that can open your database.
- The latest KeePass version can be found on the KeePass website:  
<https://keepass.info/>.
